WORK EXPERIENCE

Automaticity

QA automation internship | Dec. 2025 - Mar. 2026

- Developed automated end-to-end tests for a web shop using Playwright.
- Applied QA principles and conducted basic performance testing using k6.
- Tech stack: Playwright, JavaScript, k6, QA principles

Remote Technology RS (Client: Replai)

Junior Operations Engineer | June - Sept. 2025

- Collaborated in a remote, sprint-based workflow to design and develop 2D and 3D Unity projects.
- Implemented and optimized core gameplay mechanics, while also producing gameplay reels in After Effects.
- Participated in sprint planning and retrospectives, contributing to on-time delivery.
- Tech stack: Unity, C#, Git, After Effects, Photoshop

Vega IT, Novi Sad

Mobile Engineer Internship | April 2024

- Built a cross-platform mobile app (iOS & Android) in React Native integrating NASA's Mars Rover API.
- Developed modular UI components, implemented caching, offline storage, and unit tests.
- Tech stack: React Native, TypeScript, Redux, Jest
